Thanks Dan

Jim – Any update you can provide – GM’s certification manager is now calling me daily asking when the results will get into Verify – it also appears that they will want to retest one of the results which was out by more than 3% and the re-testing process cannot be triggered unless and until the results are in Verify.

Thanks,

David

David,

They were run in CTTF. Jim Bryson is working on it.

Subject: Quick question about Verify data entry for confirmatory tests in the hot cell

Dan,

I believe early last week a GM Equinox diesel with the 1.6L engine ran two confirmatory FTP and HFET tests in the hot cell. We have the hard copy results, but, GM needs the data entered into Verify so they can start on submitting their fuel economy label data. Our tests are now their official tests. Any thoughts on when those data are going to be entered into Verify?

Thanks,

David
